ENERGY
SQUARE

COMPANY
PROFILE

ENERGY SQUARE

VISION & MISSION

VISION

Deliver the highly professionally of international oil service companies to Kuwait market.

MISSION

Enhance the value of the high quality products and services we support and contribute to the success of our customers.

ENERGY SQUARE

PHILOSOPHY

- We are committed to operate our businesses as a valued neighbor in the communities in which we reside.
- We believe that integrity and honesty are essential, and we will not compromise them in our business.
- We will continually improve everything we do more efficiently and better than our competitors.
- We strive to achieve superior return on equity and superior earnings growth for our shareholders, both short and long term.

ENERGY SQUARE

CORE VALUES

CORE VALUES

- **Integrity:**
Do the right thing with Excellency.
- **Creativity:**
Be an innovator.
- **Success:**
Achieve leading results.
- **Improve:**
Learn and achieve .
- **Knowledge:**
Understand the customer needs.
- **Commitment:**
Deliver high quality service.
- **Safety:**
Interdependent Safety Culture.

Services

ENERGY SQUARE SERVICES

- Representing international oilfield service companies as a sponsor in Kuwait.
- Provide support services for KNPC and some services companies such as water, Diesel and Acid supply.
- Trading business in specialized chemicals for oil field.
- Energy square introduce Pumping Services, Chemical Mixing Systems, Hauling Fluids (OBM, Water, Diesel & Acid), transportation and associated services.

MAIN SERVICE LINE

MIXING AND PUMPING SERVICES

Mix and Pump as per client standard and procedures, using electronic Balance, Hopper, Centrifugal pumps, and Storage tanks up to 2500 bbls (could be extended as per client requirements).

COATED FRAC TANKERS

COATED ACID TANKERS

Specification:

Acid resistance, 4" Suction & Fill-Up lines with Hummer union connection, Can haul two different fluids on one time.

TREATED WATER TANKERS

Specification:

10,000 gals Tankers, Equipped with Centrifugal pump to Off-load the tanker within 15 minutes and 4" Hummer union connection.

OIL BASE MUD ROAD TANKERS

Specification:

10,000 gals Tankers, Equipped with Centrifugal pump to Off-load the tanker within 15 minutes and 4" Hummer union Fill-up and Suction lines.

IT SERVICE

- IT Square combines technical excellence with great customer service and value for money.
- We create new team for each project, ensuring the best possible combination of skills and experience to meet the client's needs and deliver high quality solutions.
- Working together consistently results in creating intelligent solutions to meet our client's evolving business demands.

PRODUCTS & SERVICES

- To design, develop, implement and maintain mobile iOS applications.
- To design, develop, implement and maintain mobile android applications.
- To design, develop, implement and maintain web sites and web based systems for private and public sector enterprises.
- To design, develop, implement and maintain Windows Applications.
- To design, develop, implement and maintain distributed application using xml web service and web api as multi tier applications.

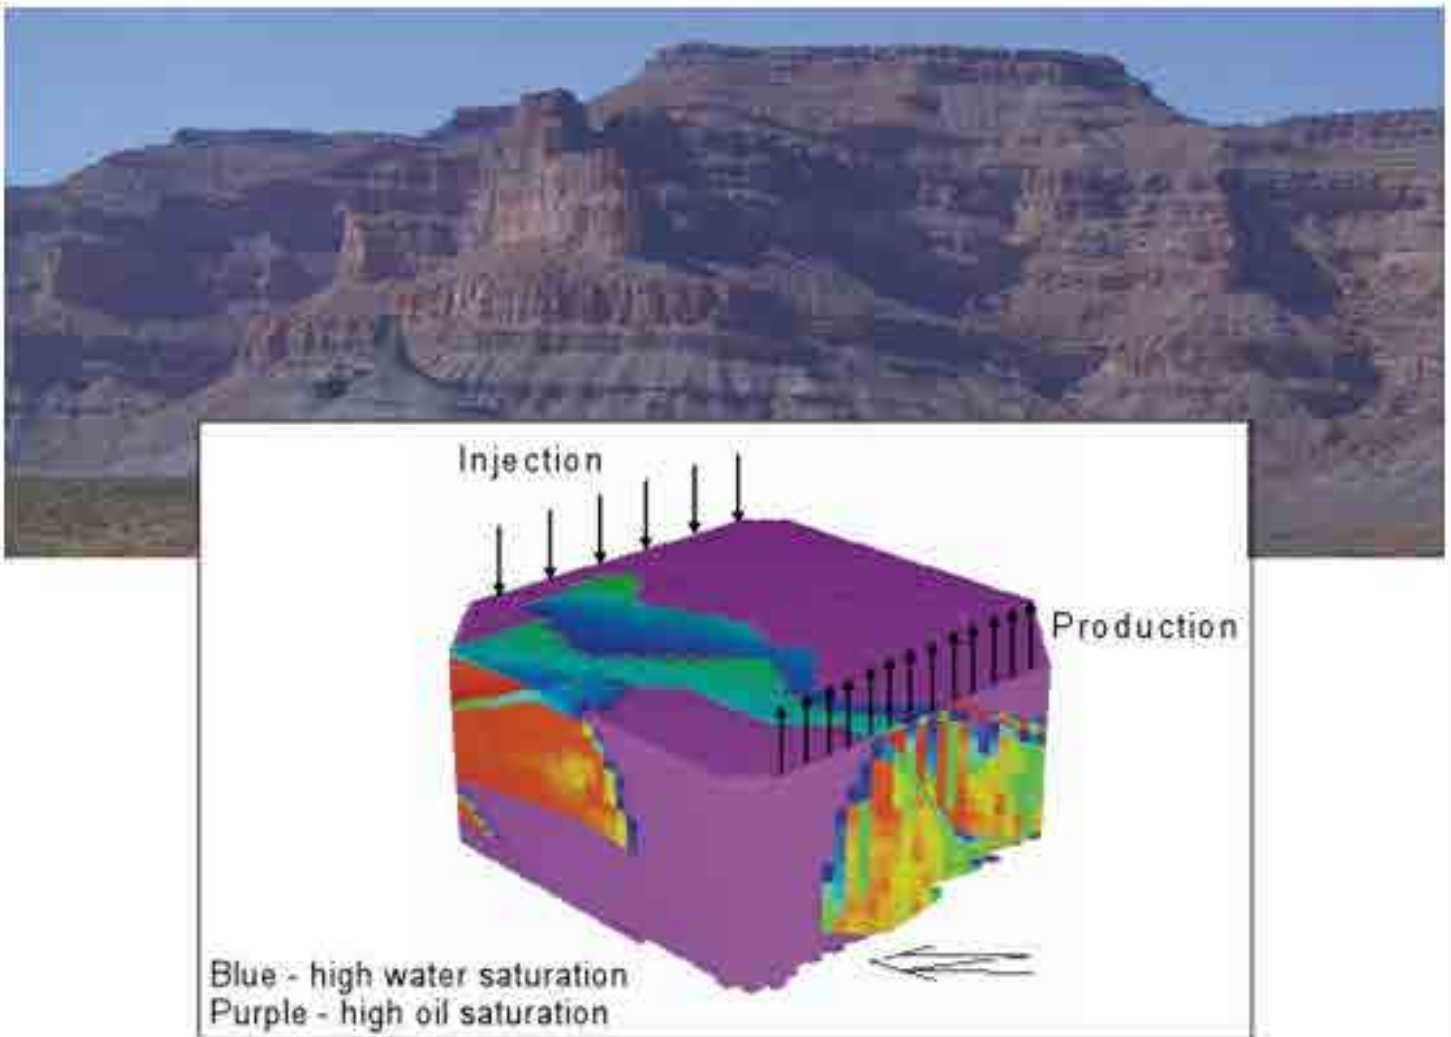

WHAT MAKES US DIFFERENT

- Our exceptionally deep technical expertise allows us to take on projects often perceived as too complex or difficult by other developers.
- We believe in working in partnership with our clients to understand their unique needs and working methods.

SPECIAL SERVICES

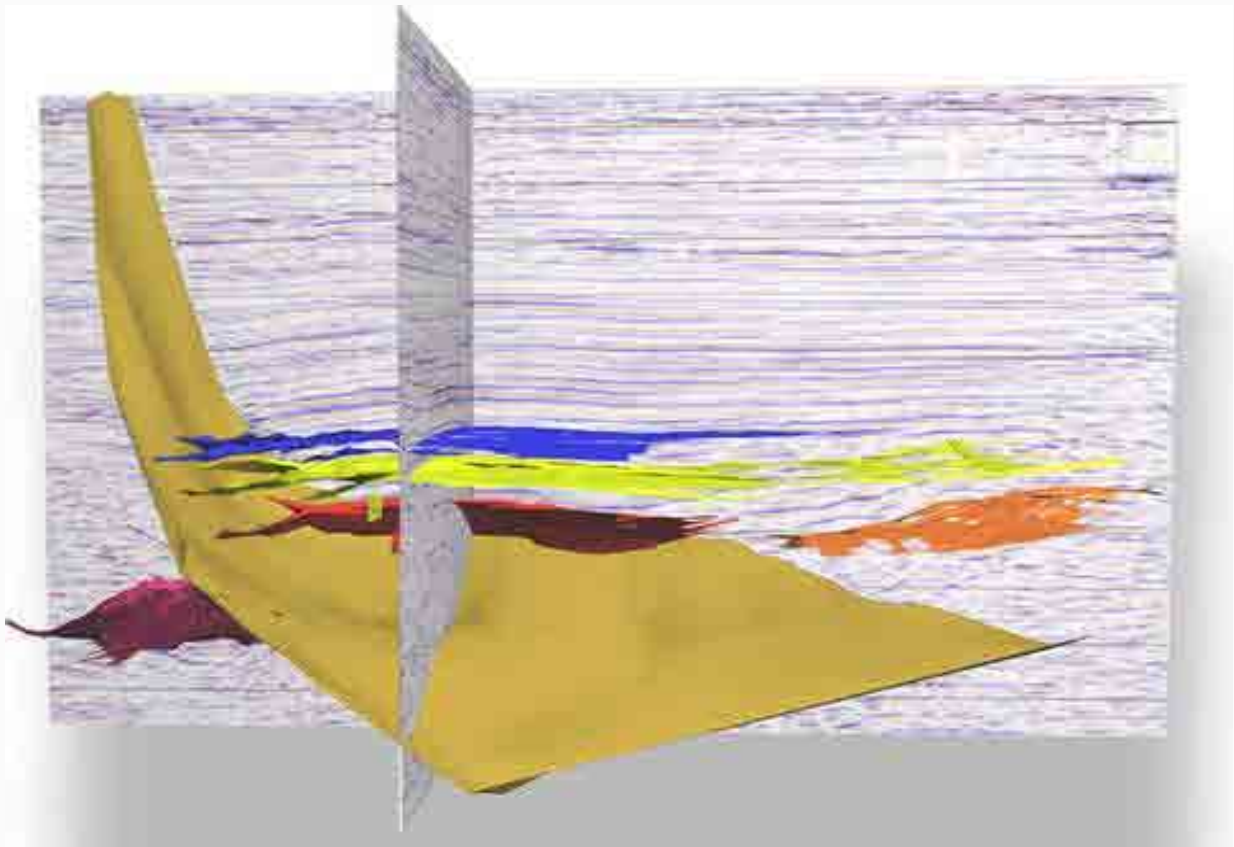

INTEGRATED RESERVOIR STUDIES (IRS)

- IRS is a combination and co-ordination of separate and diverse elements or units into a more complete or harmonious method of working.
- Therefore it is considered as a process whereby extra value is produced.
- In the petroleum industry, integration primarily concerned with the manner in which different disciplines efforts are combined to improve an established analytical process.

PRODUCTION OPTIMIZATION STUDIES (POS)

- POS is the process of looking to well and reservoir data and analyzes them in an integrated approach with multiple surface and subsurface disciplines.
- The objectives of the team who will perform such studies are to increase production, enhance recovery, while lowering costs.

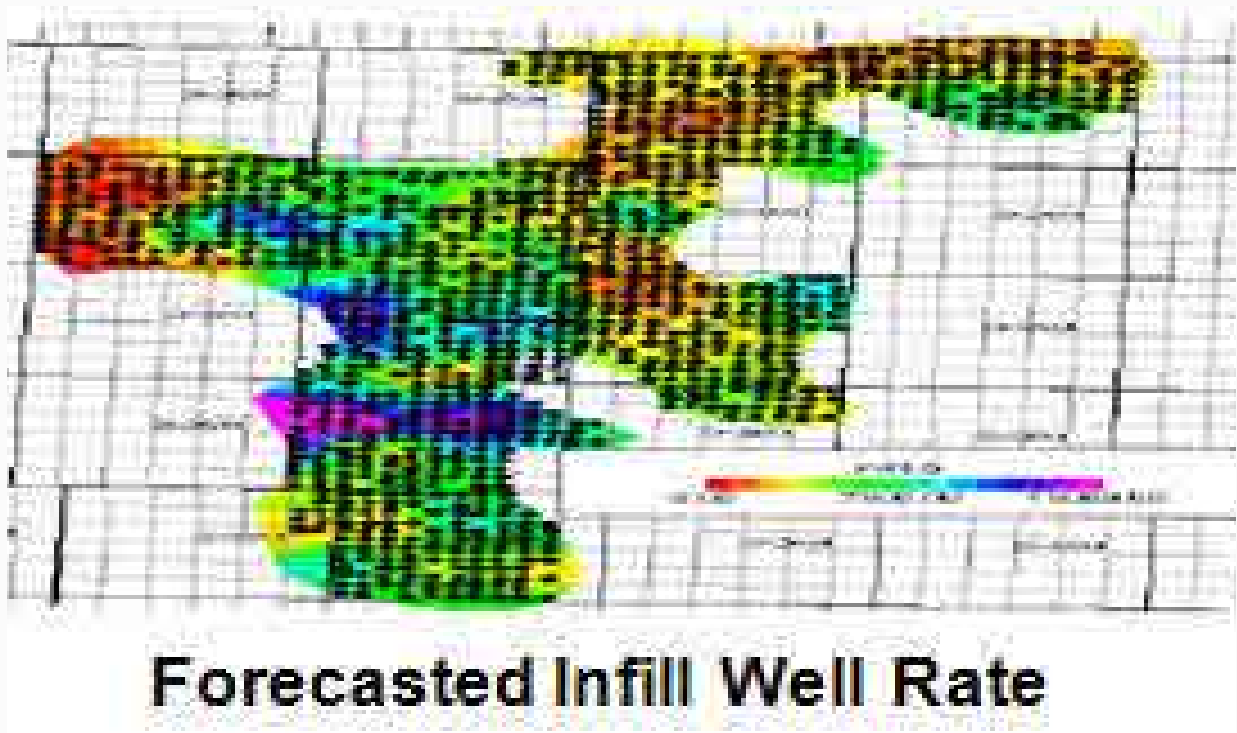

WATER MANAGEMENT STUDIES (WMS)

- Matured oil fields are basically suffering from high water production rates.
- Part of this water is good water and part is bad water.
- WMS is a process that we can apply to diagnose where we can decrease the amount of the bad water, hence reducing the cost per barrel of oil produced.

EPTS QUICK SOLUTIONS PROCESS (EPQS)

- EPQS is a process defined by a group of highly experienced people.
- The process consists of proprietary analysis techniques aimed to analyzing the reservoir data on a large scale and in a short time frame.
- This analysis will help the operators to select the best candidates for work-over and the best location to drill infill wells.

SPECIAL SERVICES

TRAINING

Provide high level of expertise for the below courses

01 - RESERVOIR ENGINEER COURSES

- Applied Reservoir Simulation (ARS)
- Integrated Reservoir Studies (IRS)
- Applied Reservoir Engineering (ARE)
- Fundamental Reservoir Engineering (FRE)

02 - DOWNSTREAM COURSES

- Oil refining: from crude oil to petroleum products
- Advanced process control
- Blending operations
- Hydro-treating & catalytic reforming
- Atmospheric & vacuum distillation
- Basic refinery operations
